[Request Parts](#)

[Add to My Bench](#)

DESCRIPTION

The TOSCANER-3000 series is the first micro-focus CT scanner in the industry to incorporate a flat panel detector (FPD).

The FPD satisfies various needs, including defect analysis and dimensional measurement using scanned data. Select from either a standard 8-inch FPD or a 16-inch FPD with higher image quality.

Ask

Ask a Question

What is your equipment name?

Begin typing your equipment model name...

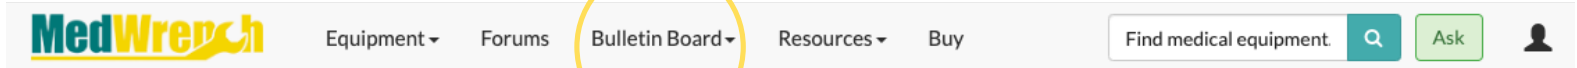

Subject

Enter a question about troubleshooting, PM, buying advice and more...

Submit Question

- Please be sure to include as much information about the equipment as possible.
- Once your question is posted, an email notification will be sent out to other MedWrench members. If they can help, they will chime in and offer support.
- We also ask that you please do not ask for any equipment passwords, or software through our forums. Do not offer to sell any products, ask where you can purchase products, or advertise your products or services. **Our forums are for technical troubleshooting only.** Any other content added to the forums may result in your account being deleted.

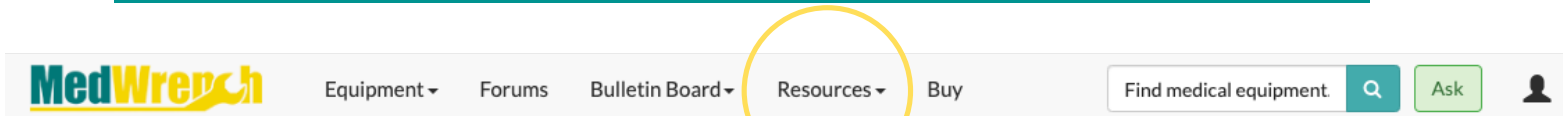

BULLETIN BOARD

The "**Bulletin Board**" gives you access to our blogs, browse upcoming industry expos & events, check out continuing education, and explore new career opportunities.

RESOURCES

The "**Resources**" tab offers educational equipment videos, Ask the Expert articles, industry news, and FDA Alerts.

MY BENCH

The screenshot shows the top navigation bar of the MedWrench website. It includes the MedWrench logo, navigation links for Equipment, Forums, Bulletin Board, Resources, and Buy, a search bar with the text "Find medical equipment", and an "Ask" button. A user profile icon is circled in yellow with a mouse cursor pointing to it. Below the navigation bar, a user profile dropdown menu is open, showing options for "My Bench", "Order History", and "Sign out". A "Welcome back, Ben." message is displayed, along with "My Bench" and "Close" buttons.

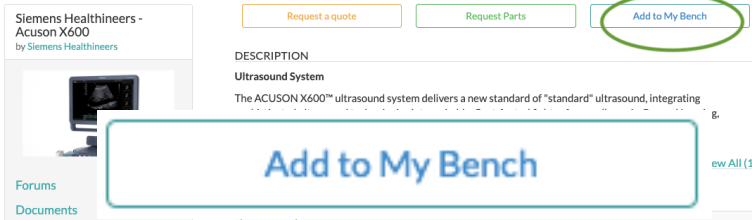

Choosing the icon at the top right will take you to your profile, where you can edit your information, view recent activity, manage subscriptions, and more.

Build Your Bench

This tool allows you to build your own digital work bench. Add items that you are currently working on, have experience with, or equipment you are interested in. Within your Bench, search and subscribe to product pages, categories and manufacturers right away!

The screenshot shows a user's profile page on MedWrench. The user's name is "Ben Calibrating" and their profile picture shows a person working on medical equipment. The "Community Feed" section is highlighted with a green oval. It contains a search bar with the text "Subscribe to more communities...". Below the search bar, there are two forum posts. The first post is titled "Flat Lined Leads" and the second post is titled "Toshiba Xario / Aplio password service 2018". The "Flat Lined Leads" post includes a "Reply" button and a "Hide" button. The "Toshiba Xario / Aplio password service 2018" post includes a "Latest Reply" section with the text "Posted By: VENGE 2 hours ago".

MY BENCH

Each product page, category and manufacturer has the option to add items to your Bench.

Be sure to opt-in to emails and notifications to build your support network. This makes sure you see relevant updates like training events, questions, articles, FDA alerts, and more for equipment that you deal with directly.

BEN CALIBRATING

Ben Calibrating, or Ben C. for short, is the face of MedWrench! While he may just be a small lego figure, you can find him all over the world! Is he helping fix broken equipment at your facility? Is he fighting off sharks at the beach? Is he crowd-surfing at a concert? The possibilities are endless!

At MedWrench, we have an ongoing competition to see where Ben Calibrating is traveling to and what he's been up to! Can you help Ben C. check off a few more places on his bucket list? Here's how to participate:

- Step 1: Like the MedWrench Facebook, LinkedIn, or Twitter page.
- Step 2: Post your picture of Ben Calibrating using the hashtag #BenC.
- Step 3: Post a funny caption with your picture telling us what Ben C. doing.
- Step 4: Make sure you tag @MedWrench in your post!
