Welcome to an introduction on how to use MedWrench. If you have any questions about anything mentioned here, please feel free to reach out to us at [info@medwrench.com](mailto:info@medwrench.com)

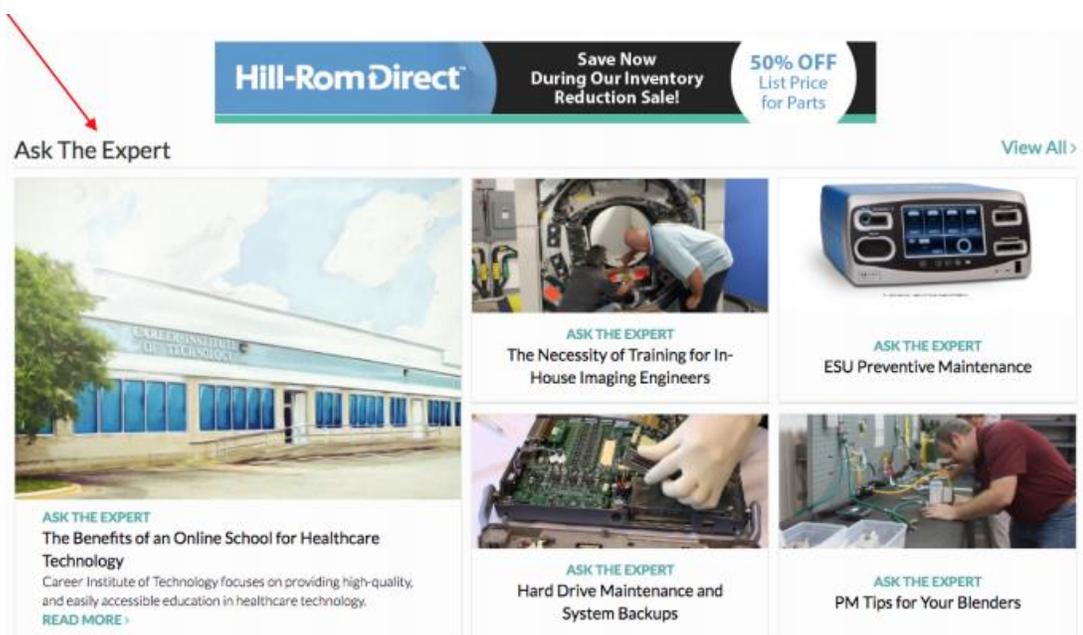

You can begin at MedWrench.com to get information, manuals, ask questions, stay up to date with industry changes, and more

## HOME PAGE

Here is the [MedWrench homepage](#), which you can always return to by clicking the “MedWrench” logo at the top left. The three buttons on this page allow you to search for equipment, shop, or ask a question.

Our unique Ask the Expert articles allows you to browse content, then ask the expert at the company featured any questions you may have! Asking the expert your industry, company, and technical questions is priceless! From our homepage, you can scroll down to view [Ask the Expert](#) articles easily!

## SEARCH

If you are looking for equipment information, or to ask a question about equipment, you can choose [“Search for Equipment”](#) on the left.

From the equipment page, you can find items that interest you. Each equipment page will show what manuals we have on file, any questions asked, news we have posted about the equipment, videos, a

parts list, and information about the product.

You can also submit a request for a quote on this page, add the item to your bench, or begin a forum question.

## ASK

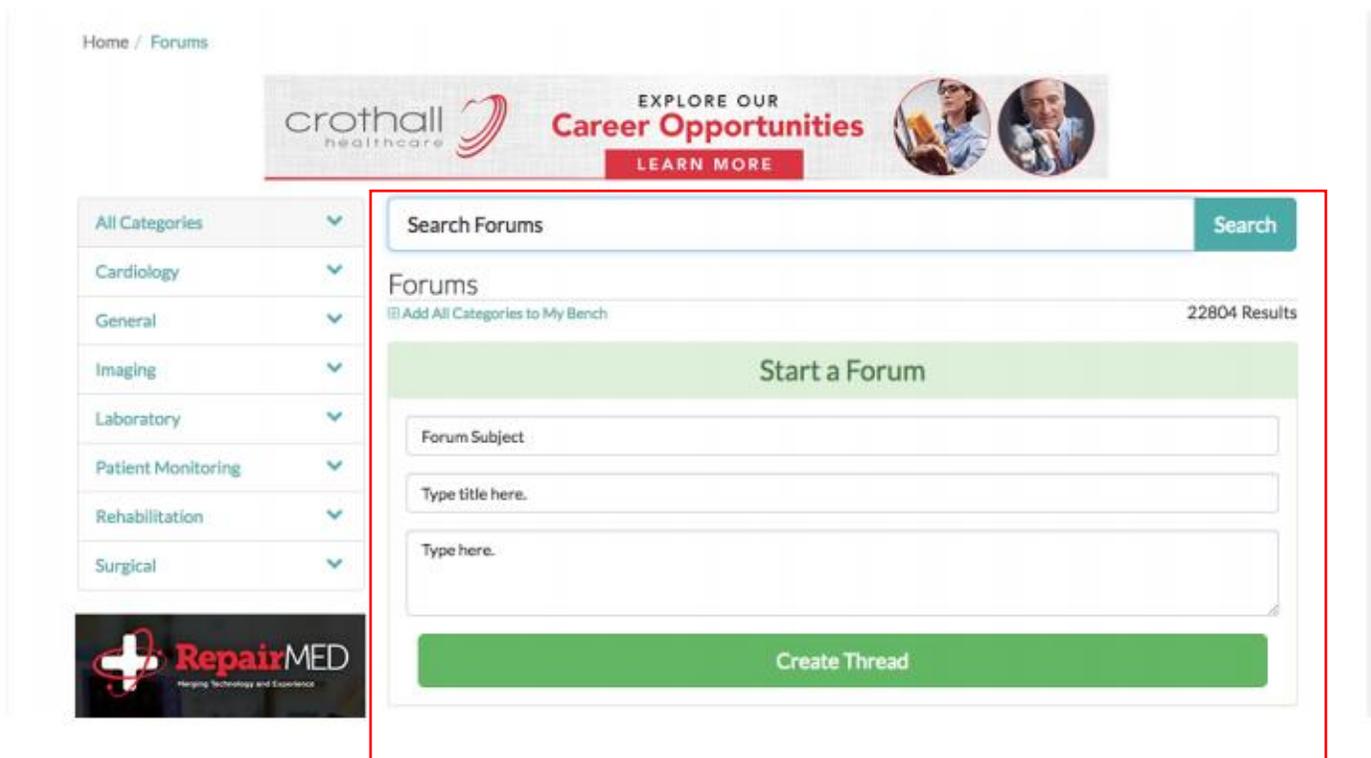

[“Ask a Question”](#) is where you can easily begin a forum question.

From the top of the page, you can search for equipment by either “manufacturer” or by “category”. This is useful if you want to see an item’s information, manuals, previous questions, and more.

You can reach our forums and begin a question, or browse through recent forum questions from the forum tab at the top of the page.

From the [forum page](#), all you have to do to begin a question is fill out the form provided. Make sure to add in as much information as possible, so other MedWrench users will be able to help you. It is not

common that someone is able to provide a manual, so please make sure you aren't asking just for a manual.

We also ask that you please do not ask for any equipment passwords, or software through our forums. Also, do not offer to sell any products, ask where you can purchase products, or advertise your products or services. Our forums are for technical troubleshooting only. Any other content added to the forums may result in your account being deleted.

You can also ask a question about equipment directly from the equipment page. Keep in mind your question is accessible by all 70k+ MedWrench members! So make sure to give them the best information that you can about your equipment so they can help.

## BULLETIN BOARD

From the MedWrench homepage, you can also access our blogs, browse upcoming industry expos & events, check out continuing education, and look at new career opportunities. The MedWrench [Bulletin Board](#) is a great place to see what we have been up to, learn more about events to attend, find a new job, and more.

## RESOURCES

Make sure to check out our [resources](#). We have educational equipment videos, Ask the Expert articles, industry News, and FDA Alerts.

## SETTINGS AND MY BENCH

Choosing the icon at the top right will take you to your profile, where you can edit your information, view recent activity, manage subscriptions, and more.

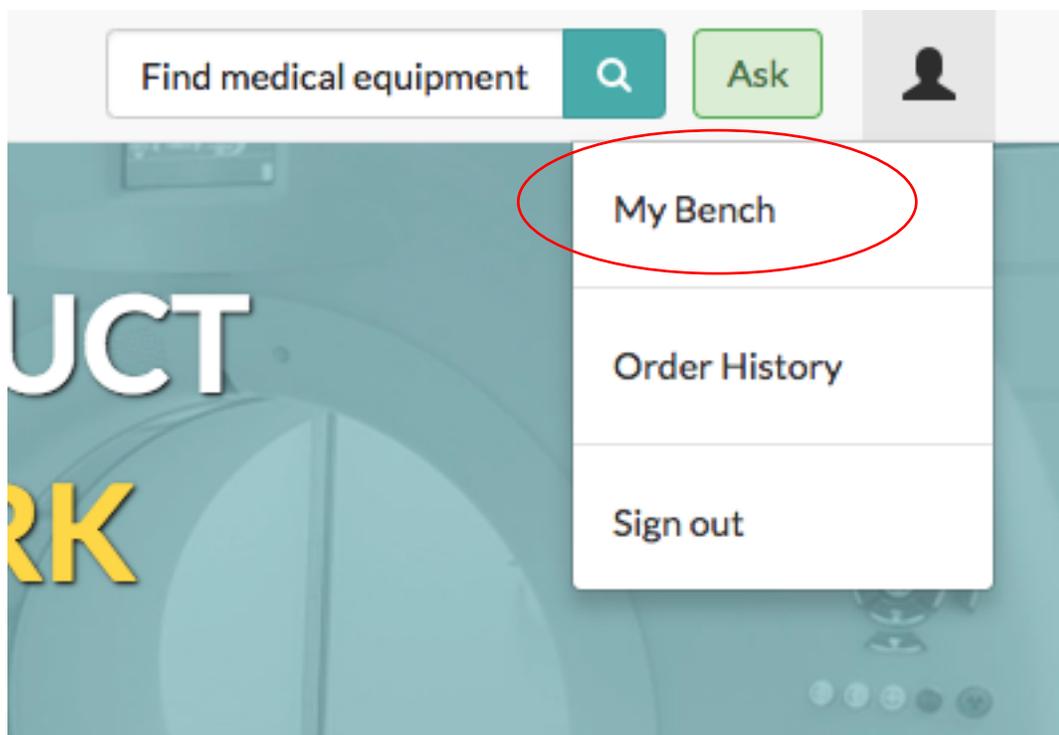

The most important feature here is the "[My Bench](#)" tool. This tool allows you to build your own digital work bench. Add items that you are currently working on, have experience with, or equipment you are interested in.

Then you will be able to check here and see ONLY relevant information to you. This makes MedWrench a better experience by streamlining the information you want, and filtering out information you don't want. Make sure to add to your bench right after making an account so you can insure you see the information you need!

You can add manufacturers, categories, and equipment to your bench!

This makes sure you see relevant updates like training events, questions, articles, FDA alerts, and more for equipment that you deal with directly.

We recommend adding items to your bench as soon as you first log on to MedWrench.

### Power Up Errors

We have a Acuson 128 XP ultrasound that has recently shown power up errors when turned on and cannot move past that screen. We are trying to determine what the errors mean. Please see the list (which show up together) below. Thanks in advance. ....

### GE ULTRASOUND VENUE-40

Stylus does not work when touch screen--senses stylus with arrow, but won't respond to selection. works with another stylus. what to do? is there a battery in stylus? or need to calibrate to unit. started last friday in trauma E/R

The “Community Feed” page is where you can see what items you are subscribed to, or subscribe to more! If you scroll down the page, you will see all information relevant to your benched items.

From this page, you can edit your community feed (your bench homepage), subscriptions, discussions, account settings, sign out, or edit your profile and even add a photo of yourself!

“Discussions” at the left shows forums you have posted or interacted with. You can easily update yourself on anything you may have missed.

“Subscriptions” tab at the left shows what items and categories you are subscribed to. This can help you easily ask a question, request a quote, check out product details, or manage your settings for this item on your bench.

### Baxter - SIGMA Spectrum

*Designed with you and your patients in mind.*

You can check from the top of the page what equipment, manufacturers, categories, and other items you are subscribed from.

Scroll to each individual item, manufacturer, or category to manage the notifications you receive. At the bottom of the listing, you will see this the ability to change those settings. If you do not want email notifications when someone posts a question regarding this item, choose “none in the drop down box. “Unsubscribe” Will take this item off of your bench.

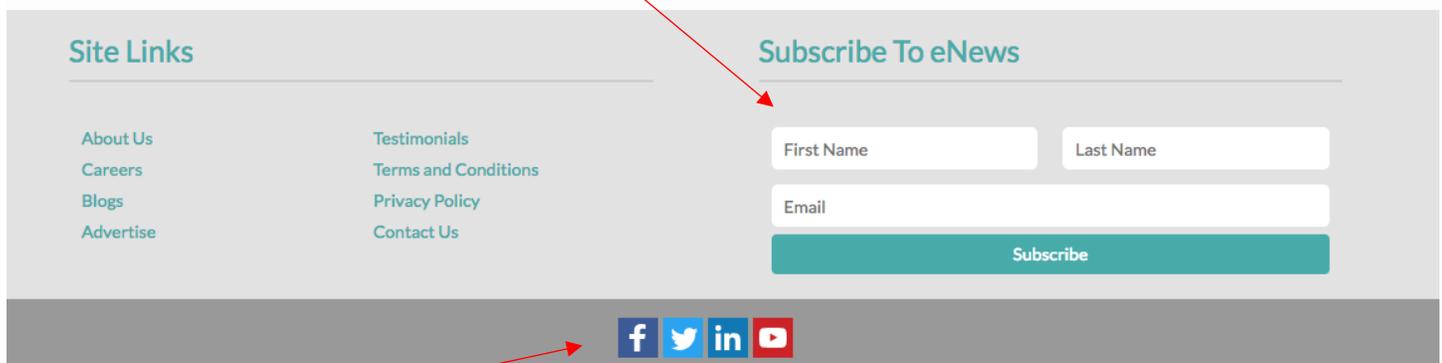

We recommend that you check the boxes to receive instant notifications, and that this item displays in your feed. Both will help you see the things on MedWrench that are important to you.

If you would like, you can even add a profile photo, by going to your “Profile” then choose “select a profile picture”.

## ADDITIONAL RESOURCES

From the bottom of the website, you can make sure you are subscribed to our eNews, and learn more about us, or view our terms and conditions.

Make sure to follow us on social media as well for the most up to date content.

You can watch an instructional MedWrench Video [here](#).

If you have questions or feel that you need more help with MedWrench, feel free to contact us at our email [here](#).
